

CRITICAL AREA SIMPLIFIED BUFFER MANAGEMENT PLAN

Please attach a site plan showing location of proposed plantings.

Property Owner _____

Address of property _____

Election District _____ Map _____ Grid _____ Parcel _____ Lot _____

Proposed activity:

- Access to private pier or shoreline maximum width of 3'
- Manual removal of invasive or noxious vegetation
- Filling to maintain an existing grass lawn
- Managing storm damage
- Repairing or replacing a septic system
- Cutting up to five dead, diseased, dying, invasive or hazardous trees (except for an emergency situation under COMAR 27.01.09.01-3 h(2))

Brief narrative describing the proposed activity:

Anticipated start date of proposed activity: _____

Proposed mitigation (including genus, species, size of tree to be planted):

Proposed planting date: _____

Proposed Maintenance Plan

The property owner will be responsible for the described plantings within the next appropriate growing season (spring or fall). For this project, planting will be completed in (circle) spring / fall _____ (year). Once planting has been completed the property owner is responsible for contacting the Caroline County Planning and Codes Department to schedule an initial inspection. Once that inspection is complete, the property owner is responsible for maintenance to ensure survival of the planting through two complete growing seasons, when the second inspection will be completed. By signing below the property owner agrees to give County Officials the right to access the property to monitor and inspect the plantings.
